

1. Learner Profile

Name: Rohit AS

Course: B.Tech in Computer Science

Semester: 6

Study Hours per Day: 4

Preferred Style: Practice-based with visual aids

2. Learning Roadmap

Planned Topics for This Month:

1. Graphs – BFS, DFS, Dijkstra, Topological Sort
2. Heap Memory – Memory allocation, fragmentation
3. Recursion – Tree recursion, tail recursion
4. Operating Systems – Process Scheduling, Deadlock
5. DBMS – Normalization, Indexing
6. Computer Networks – TCP/IP Layers, Routing Algorithms
7. System Design – Load balancing, Caching strategies

3. Learning History / Backlogs

Recent Activities:

- Completed Tree traversals (3 days ago)
- Studied Stack and Queue operations (2 days ago)
- Took notes on OS process management (today)

Backlogs:

- Graphs (started but not revised)
- Heap Memory (never studied)
- SQL Joins (incomplete)
